Application No.: 09/878,107 Docket No.: H2041.0062/P062

## AMENDMENTS TO THE CLAIMS

- 1. (Canceled)
- 2. (Canceled)
- 3. (New) A portable telephone in which bugs in the main program of the portable telephone can be corrected, the telephone comprising:

a read only memory in which a main program for the portable telephone is stored;

a volatile memory;

7

means for loading a patch into the volatile memory, the patch intended to be substituted for a portion of the main program which portion contains a bug; and

means for copying the patch into the volatile memory to create a backup patch to be stored in the read only memory.

- 4. (New) The portable telephone of claim 3, further comprising means for replacing a portion of the main program which contains the bug with the backup patch.
- 5. (New) The portable telephone of claim 4, further comprising means for erasing the backup patch after it has replaced the portion of the main program which contained the bug.
- 6. (New) The portable telephone of claim 3, wherein the main program stored in read only memory is stored in blocks.
- 7. (New) The portable telephone of claim 6, wherein the main program stored in read only memory is rewritable in units of a block.
  - 8. (New) A portable telephone in which bugs in the main program of the portable telephone can be corrected, the telephone comprising:
  - a read only memory in which a main program for the portable telephone is stored;
  - a volatile memory;

means for loading a patch into the volatile memory, the patch being used to correct a bug in the main program; and

Application No.: 09/878,107 Docket No.: H2041.0062/P062

means for copying the patch into the volatile memory to create a backup patch, the backup patch being used to correct the bug in the read only memory.

9. (New) A method for correcting bugs in a main program of a portable telephone stored in read only memory, the method comprising:

periodically executing at least a portion of the main program;

AD

loading a patch which corrects a bug in the main program into the volatile memory; copying the patch into the volatile memory to create a backup patch; and

substituting at least a portion of the main program stored in the read only memory of the telephone with the backup patch.

- 10. (New) The method according to claim 9, wherein the backup patch is erased after it has replaced the portion of the main program which contained the bug.
- 11. (New) The method according to claim 9, wherein the patch is transmitted to the portable telephone from a communications network.
- 12. (New) The method according to claim 9, wherein the patch is transmitted to the portable telephone from a personal computer.
